Shari,

Hello again it is Jaclyn from Western Michigan University. It seems that time is running out to complete our student news program and we could really use your input to move the story along. We are not interested in hard facts or intricate details from you, we would just like you to give us a brief overview of the Kalamazoo River cleanup project on camera. Meeting with you is very important and my camera man and I are willing to come to you for an interview, the catch is we need to have it by March 7, at the latest. Our schedules are open, we will make arrangements to meet whenever and wherever you are available. Please contact me as soon as you can. Thank you for your time!

Sincerely,

Jaclyn Becker
